GTA 5 mobile is not a regular game, it's a true blockbuster finally delivered on mobile devices. An action-packed crime drama featuring characters with anger management problems along with a giant sandbox world with many locations and possibilities for free-roam and exploration set in Los Santos and surrounding Blain County(San Andreas) which both were featured many years ago. Without a doubt, GTA 5 Android rightfully continues the path begun by its predecessors, however with visible changes. GTA 5 download is characterized by an abundance of violence with an accurate satirical overlook with a dosage of political incorrectness on American and Californian society. All this, supplemented by enthralling locations characterized by skyscrapers, luxury mansions, ghettos or bewildered forests and deserts, and atop of that, filled with bad-mouthed, well-designed NPCs makes the picture even more compelling. So what is it that GTA 5 android offers better value from its previous releases? Rockstar exceeded gamers' expectations and created a huge world with hundreds of unique locations both accessible in the free-roam and during main and side missions. We can take a quick ride on a bike through Vespucci Beach or find a decent set of wheels and get on one of the long hiking trails or try to break into a military base. During the gameplay, each location of GTA 5 APK provides us with its own vibe mostly thanks to the NPCs strolling nearby with well-designed behavior patterns and visual differentiation. So for instance, don't be surprised to find hiking groups staying amidst dark forests in wide valleys (perfect prey by the way), bikers fighting violent religious groups or soldiers minding their own business. The most distinctive feature of GTA 5 APK is an overhauled story play comprising three varied protagonists. Michael De Santa, an ex-con who escaped being incarcerated and set himself in a spacious mansion where he struggles with finding a meaningful way of life. Then there is Franklin Clinton, a guy who grew up in the hood with dreams of living big, yet spending most of his time in nightclubs or watching dumb tv series, and the best of them, a complete, yet intelligent maniac Trevor Phillips, who spends his time dealing with methamphetamine production and distribution or hunting down his neighbors. That introduction of three separate characters is definitely something new as we almost have separate storylines instead of one lengthy plot aimed for one character development. This way the gameplay of download GTA 5 is way more engaging. During the game, our heroes begin to work closer and we get the chance to see how the story unfolds from three perspectives. The character switching mechanics in GTA V Android is rather simple - we just click on the round choice panel and switch between. So adjusting your preferred gameplay style accordingly could not be any easier. Although it seems to be a nice addition, it's hard to tell if it does any good. Grand Theft Auto franchise used to be more realism focused and many gamers liked it the previous way. Well, at least Grand Theft Auto 5 will leave you with more options to rewind and play again. If you download the GTA 5 mobile, you'll find out a huge variety of vehicles of all types as well as an option for their customization in body shops scattered around Los Santos. Of course, stealing cars is a must-have activity, hijacking planes and helicopters is also a good source of entertainment especially after you decide to fly fighter jets and shoot down other aircraft. The combat system was also changed in grand theft auto. It's less clunky and more fun to use. Weapons' choice was also enriched and customization of arms was also included to boost overall experience and give a more "personal" touch. It's worth noting that in the GTA V version the driving system and physics were radically refined too. There is a visible difference in driving - vehicles do not seem to be that heavy and steering seems to be a lot easier. If you were a fan of driving style from a previous grand theft auto game, you will be unfortunately disappointed. It's less realistic. Moreover, a true first-person gameplay option was added for the first time in the history of franchise enabling to adjust playing style and showcasing Los Santos from a completely new view. The storyline in GTA 5 Android is being uncovered gradually rather than rapidly. At first, it starts with a retrospective to frosty North-East of the USA to then unfold into present times where we can witness main protagonists acting on their current affairs such as taking part in shootings, planning and executing true heists involving bank robberies or hijacking military airplanes with their precious cargo. All that with underlying ridiculous dialogues and arguments between the three. Overall, the story in GTA 5 APK game is catching and entertaining with many twisted moments as well as enabling players to make choices and determine the fate of that trio. In the PC, console and mobile version for android of GTA 5 creators added a multiplayer module called GTA Online, where players can set up their individually customized characters and start working jointly or separately on heists or assassination missions. It's a comprehensive addition to the game or rather a whole new game for many hours of joy. GTA V rocks with its graphics on every system version and platform. It uses advanced rendering engines contributing to effective dynamic shadows, great post-processing effects, and overall performance. To come up with such a result, Rockstar Games had contributed immense amounts of time to its production. They had been recording and photographing true locations existing in LA and nearby, rehearsed real-time crime specialists to better understand law enforcement responses or heist preparations, put a lot of effort into character development and screenplay by employing motion tracking teams and systems and conducting actor castings for better immersion and credibility. It is indisputable that GTA 5 APK uses a lot of RAM and a decent graphics card is a must, however, it is considered well optimized for other platforms such as Xbox with its editions (360 and One), on PlayStation 2 - 4, and should run smoothly especially on mobile platforms. Therefore, GTA 5 is an entertainment extravaganza suitable for anyone having a bit of free time, and regardless of their age. GTA 5 mobile is a familiar action game for many players. It may have been associated with our childhood. The game will remind you about your adventures in the city, and fighting the criminals or the police. GTA players have gone through many different versions of this fascinating game. GTA 5 is a new version, which Rockstar Games would like to bring to GTA fans. The small town where you can do whatever you want. Your actions can be crimes or madness, which will cause you or your personality to explode. It is the attraction of GTA games. Initially, GTA V was only released for PS4 and XBOX. At present, it is also available for mobile phones. GTA V Mobile brings fascinating gameplay and great graphics. Let's download and enjoy GTA V on your phone right now! GTA 5 mobile will continue the story in Part 4 of this fascinating GTA series. In the game, what you will see will be drugs, violence, racing, and more which you will hardly see in real life. You will always be controlled by the police. They will control the violations of any player in the game. GTA 5 on other platforms broke many gaming industry sales records with \$ 1 billion after three days. The game has received great support, positive reviews, and many other compliments on graphics. However, GTA 5 also has a lot of criticism and litigation of violence, sex discrimination... But I am sure that if you have searched for this game and read our article, you are a fan of this game. You should ignore its weak points and enjoy the game. How to play in the GTA 5 mobile Grand Theft Auto V will still retain a similar look to many GTA games. You will easily recognize what you need to do inside this game. Everything will be free. You can do what you like and live life your way. You can choose to be a good person, a good citizen, or you can choose to be a hooligan who destroys the city to seek the pleasures of life. It has no change in gameplay but GTA V has changed quite a lot of things to make the game more attractive. In GTA 5 mobile, you will see more type of machines than in any previous version. Vehicles and other means of transport are also significantly improved. Rockstar producer has also added physics effects to make things real. That change has made the driving mechanism more enjoyable, in which you will find yourself participating in a real racing game. GTA 5 also added a few other unique features, one of which is the character switching feature. This feature will allow you to own up to 3 different characters in the game. When you control one of the three characters, the other two characters will still live as normal. You will be surprised by the things your character has done when you are not controlling them. In previous versions like GTA 3 mobile and GTA 4, this only allows you to observe everything in the 3rd view from the top down. But with GTA 5, the Rockstar game maker decided to bring the first look to players, which is to change the gameplay as well as bring the most exciting experience to the player. You will be looking at everything from the main character's perspective so everything in the game will be more elaborate. Your character can interact better with other objects or other characters in the game. GTA 5 also includes other activities such as yoga, water moto, parachute, etc. For the first time in the GTA series, it appears the animals such as dogs, cats, or rabbits. However, they will appear quite a bit, but it is still a noticeable change. Attractive features in GTA 5 mobile The map in GTA 5 is very large, which includes many small parts such as cities, deserts, arable land, towns, mountains, and oceans... all will be created in detail. The map area in GTA 5 is more extensive than the combination of GTA 4 and GTA San Andreas. It will be about 70 square km, so you will probably need a lot of time to explore it. GTA 5 has the most abundant vehicle collection ever. There are many types of vehicles are added to the game such as airplanes, helicopters, skis, and more. Players are free to choose their favorite cars to easily explore everything. The weapon is also a thing to be mentioned in GTA 5. The game will bring most weapons sorted by the use such as melee, shoot, blast... You can also see the return of special equipment such as parachute guns, rifles with silencers, golf clubs... GTA 5 has a multiplayer mode similar to GTA 4 mobile, but it will have more features, even compared to many online games today. You can see features such as level up, do tasks, buy clothes, make money... GTA 5 graphics are great. You need to prepare your device well if you want to experience smoothly all the features of the game. The graphics upgrade is also proof that you can customize your character in detail. You can change the details from the smallest tattoos to the size and weight of the character. Graphics in GTA 5 mobile The game possesses extreme graphics configuration, players will feel like they are immersed in the real gangster world. Rockstar always pays attention to the smallest detail, ensuring the authenticity and vividness of the bloody street robbery genre. Therefore, this also becomes a disadvantage in the mobile version. Subtle graphics effects are proportional to how fast your screen "burns". Therefore, it is recommended that gamers should adjust the graphics to average when installing the GTA 5 mobile version. The character creation part is very carefully invested by Rockstar. When playing online mode, you will be provided with a separate character creation system, and no character is the same as any other character in the game. Through updates in Grand Theft Auto V, RockStar is always adding in-game skins and vehicle designs. This makes them not only extremely beautiful and always have many choices for gamers, but also creates the uniqueness of each player. How to install GTA 5 mobile for your Android phone?
